CHAOS Class - questionnaire

Name:
email:
major:
classification and graduation date:

(1.) What is your experience with Differential Equations analysis? (i.e. Linearized stability, Phase planes, nonlinearity etc.)

(2.) What is your experience with numerical methods and algebraic solvers? (things like Maple mathematica, Matlab and methods like Euler's, Runge-Kutta etc.)

(3.) What would be your favorite non-math application and why? (ie. subject area..like biology, etc.)

(4.) What is your interest in learning about chaos?

(5.) Tell about your linear algebra and Differential equations classes and your performance.

Please add anything else you wouldlike to share on back or bottom.
